In re Application of  
Koster et al.

Application No. 10/760,085

Filed: January 16, 2004

For: CAPTURE COMPOUNDS, COLLECTIONS THEREOF AND METHODS FOR  
ANALYZING THE PROTEOME AND COMPLEX COMPOSITIONS

Attorney Docket No: 8019

Pub. No.: US 2005/0042771 A1

Pub. Date: February 24, 2004

This is a decision on the request for a corrected patent application publication under  
37 CFR 1.221 (b), received on April 15, 2005, for the above-identified application.

The request is granted-in-part.

The corrected patent application publication will be published in due course and will only  
include corrections for material errors made by the Office.

37 CFR 1.221 (b) is applicable “only when the Office makes a material mistake which is  
apparent from Office records.” A material mistake must affect the public’s ability to appreciate  
the technical disclosure of the patent application publication, to determine the scope of the patent  
application publication, or to determine the scope of the provisional rights that an applicant may  
seek to enforce upon issuance of a patent.<sup>1</sup>

The instant request also includes mistakes that are not material errors by the Office, which will  
not be corrected by a corrected publication by the Office.

The errors mentioned on pages 32, 33, 34 and 35, wherein applicant requests that the “wedged”  
bond shown in the publication be replaced with a “dashed” bond will not be corrected as  
requested by applicant as the structures in the application papers show a “wedged” bond.

Applicant is reminded of her duty to conduct a reasonable inquiry before filing a paper before the  
Office. See MPEP 410.

<sup>1</sup>Changes to Implement Eighteen-Month Publication of Patent Applications, 65 FR 57023, 57038 (Sept. 20, 2000),  
1239, Off. Gaz. Pat. Office Notices 63, 75 (Oct. 10, 2000) (final rule).

Applicants have been advised to file applications having cleaner and larger text with sufficient clarity and contrast to permit reproduction, such as electronic reproduction by digital imaging and optical character recognition, which will avoid errors in the patent application publication process. See 37 CFR 1.52.

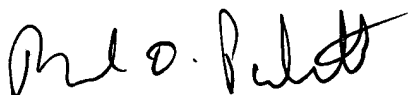

The applicant is advised that a "request for republication of an application previously published" may be filed under 37 CFR 1.221 (a). Such a request for republication "must include a copy of the application compliance with the Office's electronic filing system requirements and be accompanied by the publication fee set forth in § 1.18 (d) and the processing fee set forth in § 1.17 (i)." If the request for republication does not comply with the electronic filing system requirements, the republication will not take place and the publication fee set forth in § 1.18 (d) will be refunded. The processing fee will be retained.

Any request for republication under 37 CFR 1.221(a), must be submitted via the EFS system and questions or request for reconsideration of the decision, should be addressed as follows:

By mail to: Mail Stop PGPUB  
Commissioner for Patents  
P.O. Box 1450
